

DEEP STATE

DESTROYER SERIES—VOLUME 28

The Globalist DEEP STATE established an international spy network called "Five Eyes" to open backchannels for unconstitutional spying on our citizens, avoiding domestic laws, triggers and Congressional/Senate oversight. 2016 was the year when the world was almost completely destroyed by criminals.

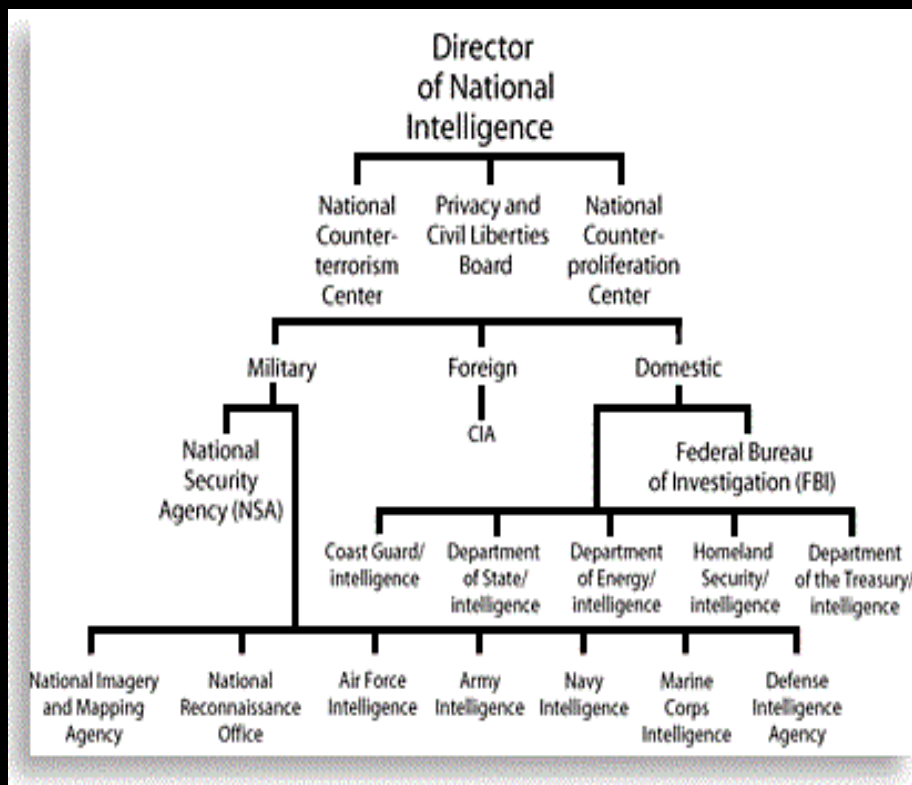

Top 10 intelligence agencies worldwide in 2020

The 1930s and '40s gained MI6 a reputation for being one of the world's top spy agencies, and they indeed had a significant part in training US agents once America entered the Second World War. Post World War II, MI6 had to shake off numerous infiltrations by Russian double agents, and by the '80s and '90s, it had become a much more.

The International Contract Agency is a global conglomerate of hitman and professional assassins

It is essentially a vast worldwide, well-funded clandestine operation organization, with underlying connections to the foreign legion, providing assassination and mercenary services. Credited assassinations have taken place in the Americas, the Pacific Rim, and Eurasia. The Agency enjoys the cooperation of affiliates such as the FBI, FIB , CIA, MI6, CSIS, NSA and even elements within the United Nations (UN). Although politically neutral and ethically amoral, the Agency avoids accepting hits ordered by enemies of its allies in government bureaus.

The National Security Agency (NSA), the Cybersecurity and Infrastructure Security Agency (CISA), and the Federal Bureau of Investigation (FBI) have jointly released a Cybersecurity Advisory, "Russian SVR Targets U.S. and Allied Networks," to expose ongoing Russian Foreign Intelligence Service (SVR) exploitation of five publicly known vulnerabilities. This advisory is being released alongside the U.S. Government's formal attribution of the SolarWinds supply chain compromise and related cyber espionage campaign. This advisory is also being published to highlight additional tactics, techniques, and procedures being used by SVR so that network defenders can take action to mitigate against them. Mitigation against these vulnerabilities is critically important as U.S. and allied networks are constantly scanned, targeted, and exploited by Russian state-sponsored cyber actors. In addition to compromising the SolarWinds Orion software supply chain, recent SVR activities include targeting COVID-19 research facilities via WellMess malware and targeting networks through the VMware vulnerability disclosed by NSA. This was highlighted in NSA's Cybersecurity Advisory, "Russian State-Sponsored Actors Exploiting Vulnerability in Workspace ONE Access Using Compromised Credentials." NSA, CISA, and FBI strongly encourage all cybersecurity stakeholders to check their networks for indicators of compromise related to all five vulnerabilities and the techniques detailed in the advisory and to urgently implement associated mitigations. NSA, CISA, and FBI also recognize all partners in the private and public sectors for comprehensive and collaborative efforts to respond to recent Russian activity in cyberspace.
